SNARS Coronavirus Bored as Hell Antidote!

Volume I number 5, April 16, 2020

PRODUCT REVIEWS:

The Abbree line of folding gain antennas for handhelds. With the right adapter you can use on most handhelds ! Those of you that go out in the back country may want to look at these for hitting distanced repeaters . They are inexpensive and work ! There are several sizes and models .

HOW TO:

How to use an antenna analyzer ! This is a good basic info video by K7AGE . There are as many antenna analyzers as radios out in the marketplace. Every thing from \$50.00 kits to \$500.00 + models . Desk top to pocket size and everything in between . Simple basic ones to models with all the bells and whistles .
